Atty Dkt. No.: STAN-235CIP

USSN: 10/663,497

AMENDMENTS TO THE CLAIMS:

1-7. (canceled)

8. (previously presented) A method of screening for a human individual's predisposition to atopy, the method comprising:

analyzing said individual for the presence of an INS157 polymorphism in TIM-1 by contacting a biological sample comprising DNA or mRNA from such individual with a probe that specifically binds to the nucleic acid sequence ATGACAACGACTGTTCCA, SEQ ID NO:22, bases 472-489, encoding the amino acid sequence MTTTVP, SEQ ID NO:25, residues 158-163:

detecting the presence of a complex formed between said probe and said genomic DNA, mRNA or a transcript thereof; and

analyzing said individual for the presence of hepatitis A virus (HAV) seropositivity wherein said seropositivity in an individual comprising an allele of TIM-1 comprising the amino acid sequence MTTTVP, SEQ ID NO:25, residues 158-163 is indicative of a reduced risk of developing atopy.

9-19. (canceled)

20. (previously presented) A method of screening for a human individual's predisposition to atopy, the method comprising:

analyzing said individual for the presence of an INS157 polymorphism in TIM-1 by contacting a biological sample comprising DNA or mRNA from said individual with a probe that specifically binds to a nucleic acid sequence encoding the amino acid sequence MTTTVP, SEQ ID NO:25, residues 158-163;

wherein the presence of said INS157 polymorphism is indicative of an individual's predisposition to develop said atopy.

- 21. (previously presented) The method according to Claim 20, wherein said biological sample is blood or a derivative thereof.
- 22. (previously presented) The method according to Claim 20, further comprising the step of:

Atty Dkt. No.: STAN-235CIP

USSN: 10/663,497

analyzing said individual for the presence of hepatitis A virus (HAV) seropositivity,

wherein seropositivity in an individual expressing an allele of TiM-1 comprising the amino acid sequence MTTTVP, SEQ ID NO:25, residues 158-163 is indicative of a reduced risk of developing atopy.

23. (canceled)
